amendments is found at the end of this Preliminary Amendment under Version with Markings to Show Changes Made.

[19] Figs. 8a-8j illustrate the reference designator list of Fig. 5 augmented using data from the record of Fig. 4 in accordance with methods illustrated in Figs. 7a-7c;

[65] In conjunction with Figs. 8a-8j, Fig. 7c illustrates one particular embodiment of the present invention where both sPhone 309 and rPhone 337 are compared with phone field 520, sNameLast 301, sNameFirst 307 and rNameLast 329, rNameFirst 333 are compared with name fields 510, 515, first for exact matches and subsequently for phonetic matches. Referring to Fig. 7c, the description proceeds in relation to money transfer record 310 with analysis of the record being reflected in an updated reference designator list 500c as illustrated in Fig. 8a.

[69] The indicators (R0) and (R1) are included for illustration with R0 indicating that the included information was part of the initial reference designator list 500a and R1 indicating the included information was added to the reference designator list 500a from record 310. These designators are for convenience in understanding the following development of reference designator list 500 as it is illustrated in Figs. 8a-8j. The following development includes use of R0-R10 corresponding to the initial reference designator list 500a and information added to the list from records 310, 315, 320, 325, 330, 335, 340, 345, 350.

[83] This association is accomplished by adding relevant information from record 350 to reference designator 555b. The updated reference designator 555 is illustrated as reference designator 555c on Fig. 8i. Reference designator 555c includes added sPhone 309 in phone field 520 of reference designator 555c. Further, a new master location in is added in MasterLocationIn field 525 based on the new sAgentNumber 317.

Time stamp 535 is updated to sDate 319 because sDate is more recent than the previous time stamp (block 726). With analysis of record 350 complete, it is determined if an additional record is to be analyzed (block 751).

[84] As record 355 remains for analysis, it is retrieved from money transfer record 400 (block 706) and compared with reference designator list 500 as illustrated in Fig. 7c (block 711). As illustrated by Fig. 8i, sPhone 309 of record 355 matches a phone number within phone field 520 of designator 810f (blocks 763,767). Based on this indication, it is determined that record 355 is related to reference designator 810f, thus, record 355 is associated with record designator 810f (block 721).

[85] This association is accomplished by adding relevant information from record 355 to reference designator 810f. The updated reference designator 810 is illustrated as reference designator 810g on Fig. 8j. Reference designator 810g includes sNameLast 301 and sNameFirst 307 in name fields 510, 515 of reference designator 810g. Further, rPhone 337 is added to phone field 520. Time stamp 535 is not updated as sDate 319 is not more recent than the existing time stamp. With analysis of record 355 complete, it is determined if an additional record is to be analyzed (block 751).

IN THE DRAWINGS:

In response to the Notice to File Missing Parts of Nonprovisional Application, mailed March 20, 2002, a complete set of substitute drawings, with corrected margins, is enclosed herewith in compliance with 37 CFR 1.84.

Further, in the above-referenced Notice to File Missing Parts it is stated that Figs. 8I, 8J and 8L “appear to have been **omitted** from the application” at the time of filing. Applicants respectfully state that *no drawings were omitted*, but that when numbering the drawings Applicants intentionally chose to not use “Fig. 8i”, “Fig. 8j”, nor Fig. 8l because the letters “i”, “j” and “l” are so similar that they might cause confusion.
